Gigi: Hi everyone. My name is Gigi Darcy and welcome to Pemberly Digital's brand new video portal.

Over the next few weeks, I'm excited to be given the opportunity to show you a proprietary story and communications application from the Pemberly Digital labs.

This app is currently called Domino and let me be the first to tell you, it is really awesome. You've probably heard of a life-changing application, well, our product design team tells me that this is a life-revealing application, whatever that means.

Right now Domino is just a prototype, so it's still working out some bugs, but it already has a robust interface and an intuitive AI, and, uh, some, you know, really amazing features.

But rather than tell you about it, why don't I just show you? Domino, activate menu. (beeping) Right? Okay, um, sorry. Domino, call Fitz Williams.

(ringing)

Fitz: Yo, Gigi D!

Gigi: Hey Fitz! You are on our first public call of our Domino video application, how does that make you feel?

Fitz: Pretty good, Miss D, pretty good. But, uh, your viewers are missing something.

Gigi: Oh yeah, and what would that be?

Fitz: My beautiful face.

Gigi: Well, actually, Domino can help you with that. Just push the icon on your screen and be sure to accept the terms of service.

Fitz: Wait, this one here... hey-o!

Gigi: (laughs) Looking good, Mr. Williams! You are looking good.

Fitz: I know, I moisturize. Hey, how's your bro?

Gigi: He's good, he's been... busy.

Fitz: Oh really?

Gigi: Yeah, well, you know William, just reserving theater box seats on nights when his sister has conditioning sessions.

Fitz: Hmmm, interesting. Well, in that case, I'm gonna get back to business, and you keep me posted on what's happenin' with that.

Gigi: You bet! I'll see you later, Fitz.

Fitz: Peace out, Gigi!

Gigi: So, there you go. The very first public demonstration of the Pemberly Digital Domino application. It's pretty cool, right?

For the next few weeks, I'll be here at this prototype station using the application to, you know, work out some of the bugs.

This system is so intuitive that it auto-edits, auto-updates, and auto-uploads these demo videos. Crazy, right?

I know that may sound strange to you, but it's just part of Pemberly Digital's open-minded and progressive policies.

In short, we want to see what this baby can really do.

So since whatever you see me do here is going to be uploaded, I hope it gets a little more exciting than just me calling Fitz.

Either way, be sure to like, subscribe, and stay tuned for more videos. Bye, guys. Domino, end recording.

(end screen)
